TPG Telecom launches ultrafast 10 Gigabit Fast Fibre for Business, Enterprise and Government

20 June 2022 –TPG Telecom has launched a new 10 Gigabit (10Gbps) Fast Fibre internet service for business and enterprise customers looking for the ultimate in ultrafast broadband connectivity.

The new broadband service turbo-charges the speed of TPG Telecom's existing flagship, enterprise-grade connection by a factor of ten, and is available to over 137,000 businesses in metropolitan areas of Sydney, Melbourne, Brisbane, Adelaide, Perth and Canberra.

"The launch of our new 10Gbps service will be ideal for any business in need of ultra-high-capacity broadband links. This could include banks and financial institutions that use high-speed data links for real-time fraud detection, educational institutions to support increased use of high-definition video and online learning tools, or media and broadcasting bodies requiring high-speed links for remote production and live streaming," said Tom Sykes, TPG Telecom Head of Product – Enterprise, Government & Wholesale.

"Demand for broadband is not slowing down and scalable, future-proof connectivity will be critical to any large enterprise network strategy."

TPG Telecom's 10Gbps Fast Fibre product enables customers to easily allocate the bandwidth for multiple services such as high-speed internet, private networking or dedicated cloud connectivity.

"Fast Fibre is a truly dynamic experience, with service changes able to be made in real-time through our Frontier Customer Portal and support available 24x7 as standard," Mr Sykes said.

"TPG Telecom's 10Gbps Fast Fibre has been developed with the data needs of all businesses in mind. From global enterprise and government organisations to small business, 10Gbps Fast Fibre delivers the capability and speed you need to access data-intensive applications and make the most of cloud-based solutions."

"With TPG Telecom's 10Gbps Fast Fibre service, you can extend your high-speed network from the office and into the cloud. This is essential for any business looking to make the most of workforce collaboration and increased productivity through cloud-based apps."

The launch of 10Gbps Fast Fibre introduces a 10 Gigabit per second internet service for $2,499 per month (ex-GST).

To deliver 10Gbps capability across its network, TPG Telecom will deploy high-capacity hardware upgrades at major metro locations. This will allow businesses to exchange high volumes of data quickly and securely between premises, partners and clients.

Notes to editors:

TPG Telecom's 10Gbps Fast Fibre Internet requires only a single link delivering high-speed internet. This service starts at $2499 per month (ex GST), with marginal incremental costs for additional connectivity services. Contract terms come in 24, 36 and 48 month options.
