## TPG Telecom to deliver network services for NAB

TPG Telecom Limited (TPG Telecom) today announced a new agreement with National Australia Bank (NAB) to provide fixed and mobile network services.

As part of the new agreement, TPG will deliver fixed network services across NAB's corporate offices, Business Banking Centres and branches, with Vodafone providing mobile connectivity to the majority of the NAB workforce.

TPG Telecom's Chief Operating Officer, Craig Levy said, "This agreement demonstrates the benefits of the merger that created TPG Telecom. Connectivity and technology are an integral part of NAB's operations, and there are huge benefits from having all services and support in one place. We combine decades of expertise across mobile and fixed technology to deliver market leading services and solutions for our enterprise customers."

"The TPG Telecom team is tremendously proud to partner with NAB and be able to deliver our market-leading services. We believe that the Vodafone mobile network and the TPG fibre network, augmented by the NBN, will deliver NAB's requirements and provide reliable and cost-effective connectivity." Mr Levy, said.

Using redundant TPG Fibre and NBN services across more than 700 locations, TPG's automation capabilities will provide NAB with enhanced service delivery and enable the faster delivery of network changes. A standardised network platform will also allow simpler management across thousands of sites, including on-net TPG fibre and bandwidth supplied over the NBN.

NAB Executive Enterprise Technology, Steve Day said, "This is an important step in our insourcing journey which is about increasing control and flexibility back into the company. We're extremely pleased we'll be able to bring our services together with one company and make the most of TPG Telecoms' assets including the Vodafone mobile network, TPG fibre and TPG services via the NBN network."

Vodafone will deliver a bespoke Enterprise Managed Mobility Solution to more than 80% of NAB's mobile fleet across their corporate offices and branches in metro and major regional areas. In addition to leveraging Vodafone's extensive international roaming data network which extends to more than 80 countries.

In addition, Vodafone worked closely with Google to identify and equip NAB's workforce with the Pixel4a, which will be provided to colleagues who opt for a company-provided device.
